

Automation Testing Practice Application - Test Plan

Test Plan Identifier

ATP_TP_001

Introduction

This test plan covers testing of the Automation Testing Practice Application including:

- Form Validation
- Date Pickers
- Alerts and Popups
- Multiple Windows and Tabs
- Web Tables
- Mouse Actions
- File Upload
- Link Verification

Test Items

- GUI Elements (Forms, Date Pickers, Dropdowns)
- Upload Files
- Static & Dynamic Web Tables
- Alerts and Popups
- Tabs and Multiple Windows
- Mouse Actions
- File Upload
- Links and Broken Links

Features to be Tested

- Form Submission Validation
- Phone Number Validation
- Date Picker Validation
- Gender & Country Selection Validation
- Radio Buttons and Checkboxes
- Alert Handling
- Multiple Windows and Tabs
- Web Table Validation
- Mouse Hover, Double Click, Drag & Drop, Slider
- File Upload Validation
- Link Verification

Features NOT to be Tested

Advertisement banners, header/footer UI, third-party integrations, performance testing, security testing, database testing.

Approach

- Selenium Automation
- TestNG
- Maven
- Jenkins
- Extent Reports
- Page Object Model (POM)

Item Pass/Fail Criteria

Pass Criteria:

- All test cases execute successfully.
- Expected results match actual results.
- No Critical or High severity defects remain open.
- Core functionalities (Forms, Upload Files, Alerts, Windows, Tables, Mouse Actions, and Links) work as expected.

Fail Criteria:

- Any critical functionality fails during execution.
- Test cases do not meet expected results.
- Critical or High severity defects block application functionality.
- Environment or application issues prevent successful test execution.

Suspension Criteria

- Site unavailable, HTTP 500 errors
- Browser driver failure, Critical functionality failure
- Jenkins build failure

Resumption Criteria

- Environment restored
- Defects fixed
- Test data available
- Jenkins operational

Test Deliverables

- Test Plan
- Test Cases
- Automation Framework
- Extent Reports
- Jenkins Reports
- Bug Reports
- Test Summary Report

Environmental Needs

- Java (JDK 11+)
- Selenium WebDriver
- TestNG
- Maven
- Jenkins
- GitHub
- Chrome / Firefox
- Windows 10/11

Responsibilities

QA Automation Engineer – Test Design, Automation Development, Execution, Defect Reporting, Jenkins CI/CD Integration.

Schedule

- Planning – Day 1
- Test Design – Day 2
- Framework Setup – Day 3
- Script Development – Day 4-5
- Execution – Day 6
- Retesting & Reporting – Day 7

Risks and Contingencies

- Browser compatibility issues
- Internet connectivity issues
- Jenkins configuration issues
- Dynamic element synchronization issues
- Third-party dependency failures

Tools Used

- Selenium WebDriver
- Java
- TestNG
- Maven
- Jenkins
- GitHub
- Extent Reports
- Jira

Approvals

Trainer: Vaishali

Project: Automation Testing Practice
